 Triage

## Across

- a metal rod or pin that has a head at one end and a screw thread at the other to take a nut
- device for determining whether a surface is horizontal
- hand tool for working wood, consisting of a flat steel blade with a cutting edge attached to a handle
- frame on which wood is laid for sawing by hand
- a rod-shaped metal piece with a winding groove used for fastening solid pieces together
- tool used to cut hard material with a tooth-edged blade
- small square or hexagonal block with a threaded hole through the middle for screwing on the end of a bolt
- tool for holding, twisting, or turning nuts and bolts
- rotating tool for making circular holes
- device in which a toothed rack or wheel is engaged permitting motion in one direction only

## Down

- Phillips head noun special screwdriver with the head having two partial slots crossed at right angles
- chest to store tools
- piece shaped like a triangle used to split wood or rocks and to lift heavy weights
- small pliers with long jaws for bending wire or holding small objects
- heavy iron lever with one pointed end and one forged into a wedge shape
- tape marked off in units used for measuring
- tool for turning screws
- a straight strip marked off in units measuring
- a slender piece of metal having one end pointed and the other end flattened for hammering to hold separate pieces together
- tool used for driving in nails
